AUTHOR	Scarlett, Sharon, Comp.; And Others
TITLE	Psychological, Sexual, Social and Vocational Aspects of Spinal Cord Injury. A Selected Bibliography.
INSTITUTION	Minnesota Univ., Minneapolis.
SPONS AGENCY	Rehabilitation Services Administration (DHEW), Washington, D.C.
PUB DATE	Jul 76
GRANT	16-P-56810(5-14)
NOTE	74p.; This report was developed by the Medical Rehabilitation Research and Training Center No. 2 of the University of Minnesota
AVAILABLE FROM	Minnesota University, Physical Medicine and Rehabilitation Department, 860 Mayo Memorial Building, Box 297, Minneapolis, Minnesota 55455 ($2.95)
EDRS PRICE	MF-$0.83 HC-$3.50 Plus Postage.
DESCRIPTORS	Bibliographies; Exceptional Child Research; *Neurologically Handicapped; *Psychological Characteristics; *Sexuality; *Social Adjustment; *Vocational Adjustment
IDENTIFIERS	*Spinal Cord Injuries

ABSTRACT

Presented as a bibliography with approximately 700 citations referring to research in the area of spinal cord injury. Entries are listed alphabetically by author under the following sections: psychological aspects (236 entries), sexual aspects (170 entries), social aspects (152 entries), and vocational aspects (134 entries). Information for each citation usually includes author, title, source, page numbers, and publication date. Also given are an author index, a sports index and list of included bibliographies, a listing of other sources of information, and information on other helpful bibliographies. (SBH)

PREFACE

Recent years have witnessed a rapid growth of interest in the psychological, social, sexual and vocational aspects of spinal cord injury. The research literature in these areas has proliferated accordingly, making it increasingly difficult for the rehabilitation worker to keep informed of new knowledge and to be aware of important theoretical issues. Gaining effective access to this literature presents several problems. In addition to its expanding volume, it is diffuse, with major findings scattered among references focusing on other topics, and it is difficult to identify. This literature also contains an abundance of obscure and informal references.

The immediate stimulus to this project was our effort to identify and assemble the relevant literature for a long-term follow-up study (R-47) of psychological, social, and vocational adjustment to spinal cord injury we are conducting at the Rehabilitation Research and Training Center (RT-2) of the University of Minnesota. We began our search with all of the existing bibliographies on spinal cord injury, such as those published by the Veterans Administration, the Paralyzed Veterans of America, the Woodrow Wilson Spinal Cord Injury Project, and the National Paraplegia Foundation. We also turned to general sources, such as the Research Directory of the Research and Training Centers and the Vocational Rehabilitation Index published by the Rehabilitation Research Institute at the University of Florida. While each of these was useful for its particular purpose, we found that none met the need we saw for a comprehensive, current, formal integration of the psychosocial literature on spinal cord injury.

The purpose of this publication is to provide a complete, up-

to-date, indexed bibliography of confirmed references dealing with the psychological, social, sexual and vocational aspects of spinal cord injury. Each reference has been carefully verified by the compilers, and each journal abbreviation has been standardized according to Index Medicus for easy retrieval. We believe that this bibliography will be of value to rehabilitation professionals whether their main interest is research or service. It will provide improved access to the existing literature in these areas and facilitate the dissemination of new knowledge. This is intended to be a continuing project, with supplements planned for the future.

The grouping of references is based on our best judgment of the major focus of each publication. Naturally, there were some grey areas where the decision was difficult, and the reader may disagree with our classification. Consequently, we urge the reader with a particular interest to consult the references in related areas, rather than accept our indexing as definitive. Whenever a reference appeared to devote major attention to more than one topic, we listed it under each relevant heading.

Many sources of information were utilized in this effort, including a number of individuals and organizations. A list of the organizations and individuals contacted follows the body of the bibliography. We believe that our coverage is complete through July 1975, but we realize that no bibliographic search can be completely comprehensive and that we may have inadvertently omitted relevant citations. We would welcome your suggestions and citations for our updated supplement, which is presently in progress and will be ready for distribution in January 1977, in the hopes that this bibliography may be a more timely tool for rehabilitation research.

4

Gary T. Athelstan, Ph.D.

ACKNOWLEDGEMENTS

A number of people made significant contributions to this work. Jeffrey C. Teal, Research Assistant on the project which led to this effort, suggested compiling such a bibliography and conducted some of the initial searches. Sharon Scarlett, Librarian for the Department of Physical Medicine and Rehabilitation and principal compiler, directed the subsequent searches, handled most of the necessary correspondence and exhaustive checking of references, and supervised the exacting preparation of typed copy. Each of the original and final selected references was verified by one of the staff of compilers.

Thanks are also given to Frederic J. Kottke, M.D., Project Director of Minnesota Medical Rehabilitation Research and Training Center No. 2, for his encouragement and support of this project, and to Rehabilitation Services Administration for providing part of the financial support.

Finally, we extend our thanks to the many people who responded so generously to our requests for references. If we have achieved the degree of comprehensiveness we were seeking, it is partly a reflection of their valuable help.
